Ayoub Errouichaq

Student at ENSIM, working at EDF Nantes

Cordemais, Pays de la Loire, France

Summary

I'm a work-study student with a passion for IT and digital engineering, two areas that have always captured my interest. Currently, as a project manager at EDF, I've had the opportunity to contribute to crucial initiatives for the company, which has enabled me to develop essential skills. My enthusiasm for IT and digital technology continues to grow, not least because of the diversity of applications and the countless development possibilities they offer.

Outside the professional world, I enjoy electronics, programming and culture, with a particular passion for reading. These personal interests feed off each other, strengthening my creativity and my vision of future projects.

Feel free to contact me if you'd like to discuss exciting projects or exchange ideas on the fascinating fields of computing, technology and culture. I'm always open to opportunities for collaboration and mutual learning.

Experience

EDF

Information system, telecom and digital project manager

September 2022 - Present (1 year 8 months)

Nantes, Pays de la Loire, France

- Planning and organising the various phases of the project through to deployment and operational recovery.
operational resumption, plan and manage human and budgetary resources and ensure reporting and evaluation.
- Organises and coordinates all the players involved in the operation of a system
(subcontractor, infrastructure, etc.) and leads the project management team.
Ensures quality control and feedback.

Identifies and implements opportunities to use new deployment methods
Deployment methods (Cloud, Caas, DevOps, etc.).

- Manage the resolution of complex problems (application unavailability, latency, storage problems, security, datacenter access, resilience, restoration, etc.).

- Liaising with the contracting authority. It advises the contracting authority on the expression of new requirements, the various stages of the project and contributes to change management.

EDF

Maintenance Technician

April 2022 - June 2022 (3 months)

Cordemais, Pays de la Loire, France

As part of my end-of-studies work placement, my project was to analyse and study the communication networks between the digital control system and the field PLCs at the Cordemais power plant.

Thanks to this study, I was able to draw up detailed documentation and develop an application to help control the Digital Control System.

SERIS France

Administrative Agent

July 2021 - August 2021 (2 months)

Cordemais, Pays de la Loire, France

As a seasonal worker, I was responsible for managing administrative documents and reception at the Cordemais power station.

- Managing administrative files for companies at the EDF power station
- Managing reception at the power station (workers, temporary staff, journalists, trainees, delivery personnel)

ISS PROPRETE

Cleaning and hygiene agent

July 2020 - August 2020 (2 months)

Cordemais, Pays de la Loire, France

As a seasonal worker, I was responsible for cleaning and maintaining the various types of premises at the Cordemais power station.

- Cleaning offices and workshops
- Management of cleaning resources and replenishment of cleaning materials
